Carta della usufruibilità geologica e vegetazionale del territorio di Roma Capitale

0 metri 2.000

USFRUIBILITÀ DEGLI AMBIENTI MORFOLOGICI DEL TERRITORIO

- Altopiani e pianure con copertura di tipo pianeggiante o submontano**
Usfruibilità geologica generale buona per gli interventi urbanistici, in relazione alla buona presenza di elementi di permeabilità geologica, oltre ovviamente alle reti di verifica.
Usfruibilità vegetazionale condizionata dalla qualità del patrimonio botanico e dalla possibile presenza di emergenze floristiche vegetazionali.
- Superfici a pendio naturale in arida**
Usfruibilità geologica generale buona, essa dipende dal tipo di intervento urbanistico da realizzare, dalla relazione con gli aspetti idraulici e idrogeologici e anche dalla possibilità di adozione di aree di recupero.
Usfruibilità vegetazionale condizionata dalla qualità del patrimonio botanico, dalla possibile presenza di emergenze floristiche vegetazionali e da elementi di fragilità e distanza urbanistica in relazione a quanto sopra.
- Formazioni e pianure alluvionali in rischio idrogeologico**
Usfruibilità geologica condizionata dalle caratteristiche idrogeologiche e dalla qualità del sottosuolo, in relazione alla possibilità di adozione di opere di recupero e di riqualificazione.
Usfruibilità vegetazionale condizionata dalla qualità del patrimonio botanico e dalla possibile presenza di emergenze floristiche vegetazionali e da elementi di fragilità e distanza urbanistica in relazione a quanto sopra.
- Terrazzi rurali castelli**
Usfruibilità geologica generale buona, condizionata, in relazione al tipo di intervento urbanistico, dalla relazione con la possibile presenza di elementi di permeabilità geologica.
Usfruibilità vegetazionale condizionata dalla qualità del patrimonio botanico.
- 1) In presenza di aree di rischio idrogeologico di tipo I o II (Dati) (conoscenza morfologica nel K2, K3, K4, K5, K6, K7, K8, K9, K10, K11, K12, K13, K14, K15, K16, K17, K18, K19, K20, K21, K22,
