

ROMA CAPITALE

Rome

This historic and vibrant city is taking the opportunity of smarticipate to expand participatory processes for urban regeneration, such as involving citizens in proposing new uses for abandoned buildings. The Italian capital wishes to use open data to establish a transparent base for decision-making.

Smarticipate workshop

Mobility Masterplan, ITS and Open data in Jubilee of Mercy year

Casa della città - Rome, May 9th, 2016

Ing. Fabio Nussio
International Co-operation
Mobility Agency of the City of Rome

Rome, a view on the city History and Heritage

Rome just turned 2769 years of age on Apr 21st

Rome, a view on the city

- **Municipal Area** 1.285 skm
- **Population**

Metropolitan Area	4.400.000
City Residents	2.900.000
- **Road Network** 5.000 km

Main road network	800 km
-------------------	--------
- **Vehicles** 2.650.000

Cars	1.890.000
2 wheels	600.000
Goods delivery	160.000
- **Daily Trips** 6.000.000
- **Peak-hour Trips** 670.000

Rome, a view on the city Cultural attitude for private vehicles

Motorization rate: 978 veh./1.000 inhabitants

Residents evolution in Rome

The Mobility Agency role

Rome Mobility Agency

-Planning, Regulating and Controlling Mobility (Public and Private);

- Rome Mobility Agency manages the bus service contracts performed by the PT Operators:
 - **public operator ATAC**, managing metro, tram networks and 80% of surface PT,
 - Private operator **Roma TPL** for 450 buses, 28 M km/year, i.e. 20% of the Bus service in Rome, mainly in the peripheral net
- Monthly payments to the PT operators is based on AVM service certification data

-Permits and user contacts;

- Development of new mobility projects;

-ITS tools, infomobility & Mobility Centre;

-Management of Sustainable Mobility Policies

-R&D projects (+50 from 1998)

"Metrebus" - Integrated regional PT system with single ticket

- ATAC (Public PT operator – City of Rome)
- ROMA TPL (Peripheral bus lines – City of Rome)
- Cotral (Regional Bus PT service)
- TRENITALIA (Metropolitan and regional railways)

RETE AUTOBUS URBANI		
estensione rete in km	2.060	utenza: passeggeri giorno 789.000

TOTALE RETE	4.859	2.306.000
EFFICIENZA DELLE RETE DI T.P.L.	21,3 %	

New mobility Masterplan (PGTU)

GENERAL GOALS

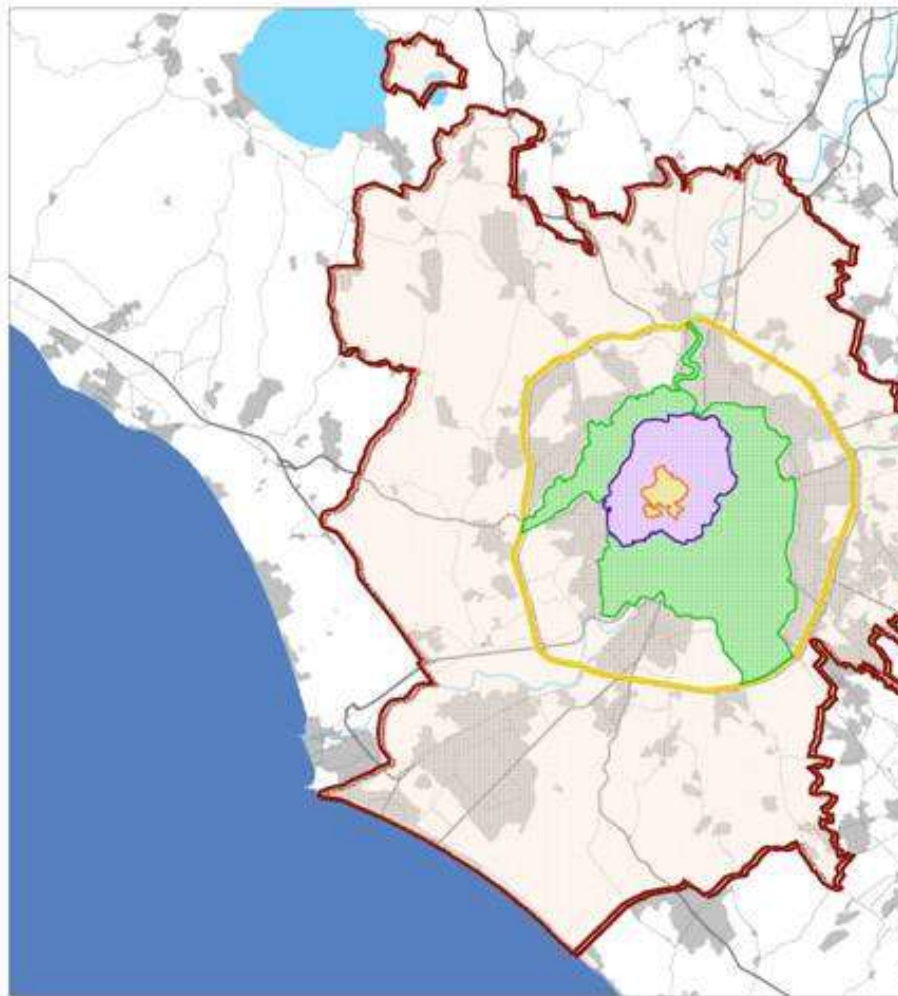

Reconnect the city, reduce private vehicles, recover **public spaces**, improve the **environment** and **quality of life** with limited financial resources

EXPECTED OUTCOMES

- Increase by **20%** public transport speed and users;
- **Reduce by 50% road fatalities** by 2020
- Increase bicycle use within 2 years from current 0.6% to 2% (daily), and **within 5 years** to 4% (in town) and to **10% in the city center**;
- Increase car and bike sharing systems
- Reduce access of private vehicles to city center

The starting point: bands of increasing restriction zones

Municipality Area – 1285 km²
“Blue Label” Emission Check
(all vehicles and PTWs)

External Ring (GRA) – 344 km²
Tourist Coaches Regulation

Green Belt – 154 km²
Pollution emergencies,
Multi-modal interchanges, Park&ride

Rail Ring – 48.4 km²
Emission restrictions, Pay parking schemes

LTZ – 5.5 km²
Stop to all vehicles (except permit holders)

Pedestrian – 1/2 km²
Zero Emission Area (walking & electric)

Main line extensions (km)

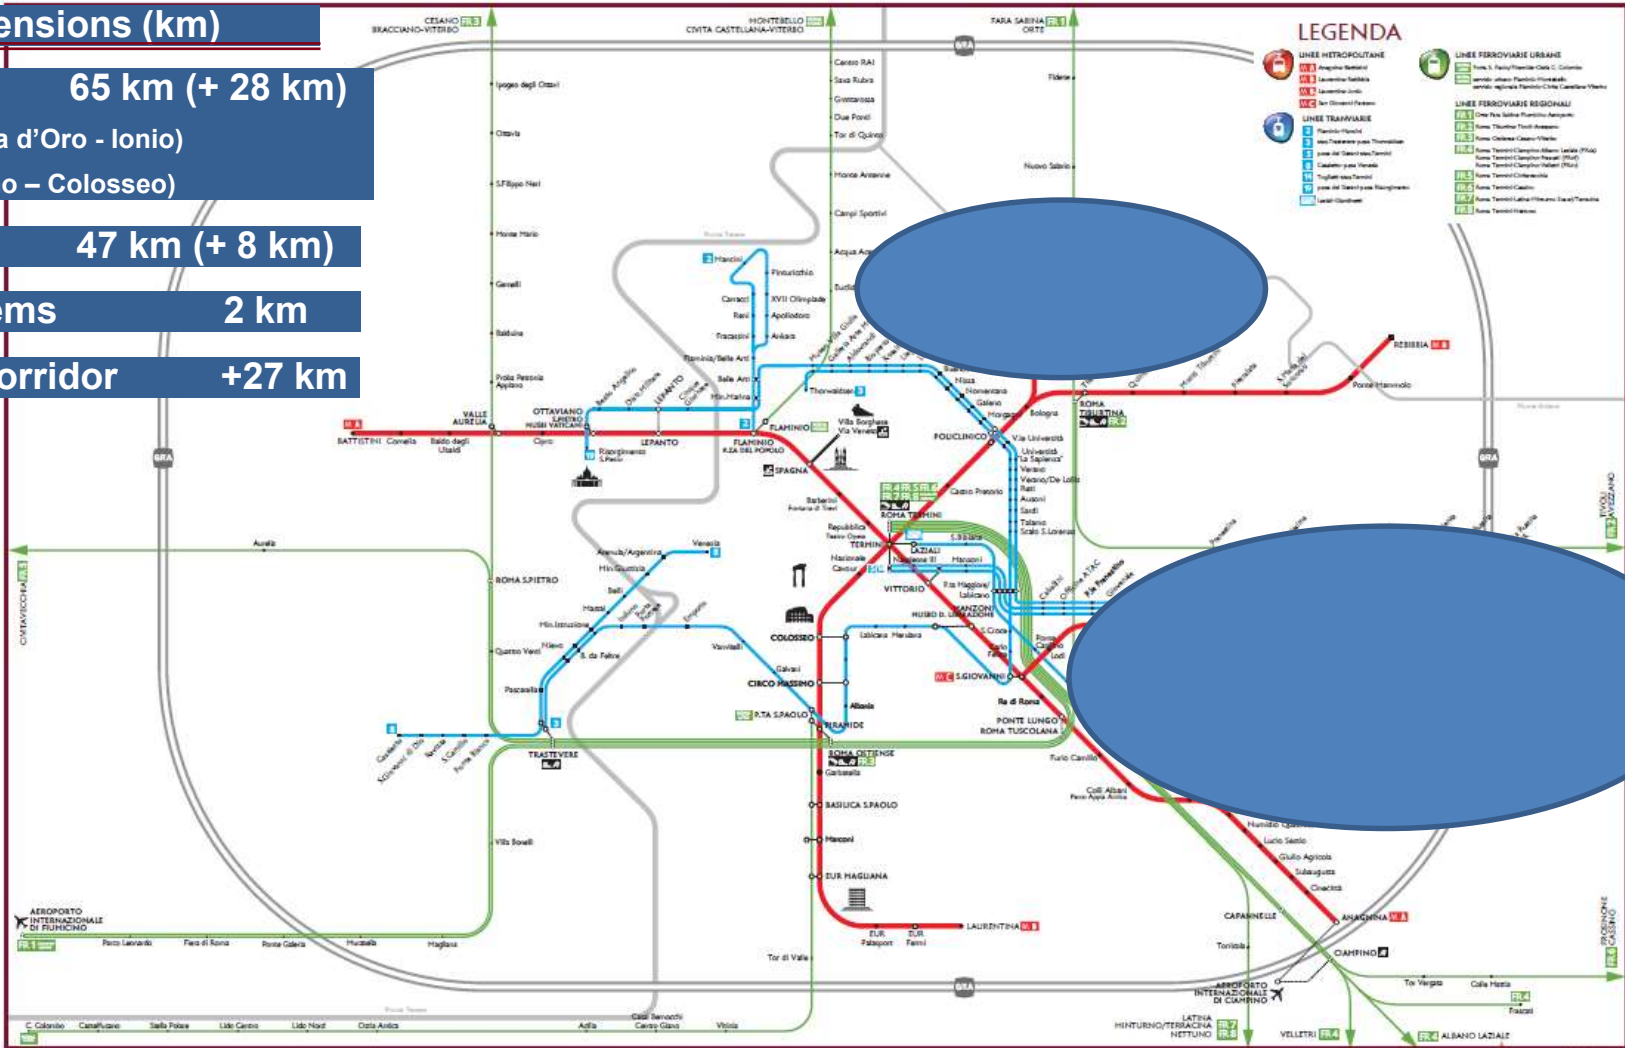

Metro 65 km (+ 28 km)

- Line B1 (Conca d'Oro - Iorio)
- Line C (Pantano - Colosseo)

Tramway 47 km (+ 8 km)

Cable Systems 2 km

Urban PT Corridor +27 km

**Modal share of
the PT network (short -term):**

25,8 %

New metro and existing background:

Piazza Venezia survey

Mass Rapid Transport System Expansion: Line C – from south to centre

Line C

— Work in progress from Montecompatri-Pantano terminal to S. Giovanni Station

Contract:
Contractor:

General Contractor
Metro C S.p.A.
(Astaldi Spa - Vianini Lavori Spa -
Consorzio Cooperative Costruzioni -
Ansaldo Trasporti Sistemi Ferroviari Spa
- CMB)

Montecompatri-Pantano/S. Giovanni
(T7-T6A-T5-T4): 1° phase – works in progress

Length: **km 18,5** (10,8 Km underground)

Stations: **22** (11 underground)

Start: **feb-2007**

Scheduled end:

- Montecompatri-Pantano/Centocelle: **2013**
- Montecompatri-Pantano/Lodi: **2014**
- Montecompatri-Pantano/S. Giovanni: **2015**

Investment: **1.818 million euro**

**Opening of the southern part
of C Line (up to piazza Lodi):**

Completed June 29, 2015!

Investment: **792 million euro**

Venezia/Ottaviano (T2)
Length: **km 3,5**
Stations: **3**

Line B1: working in a complicate environment

B1 Extension

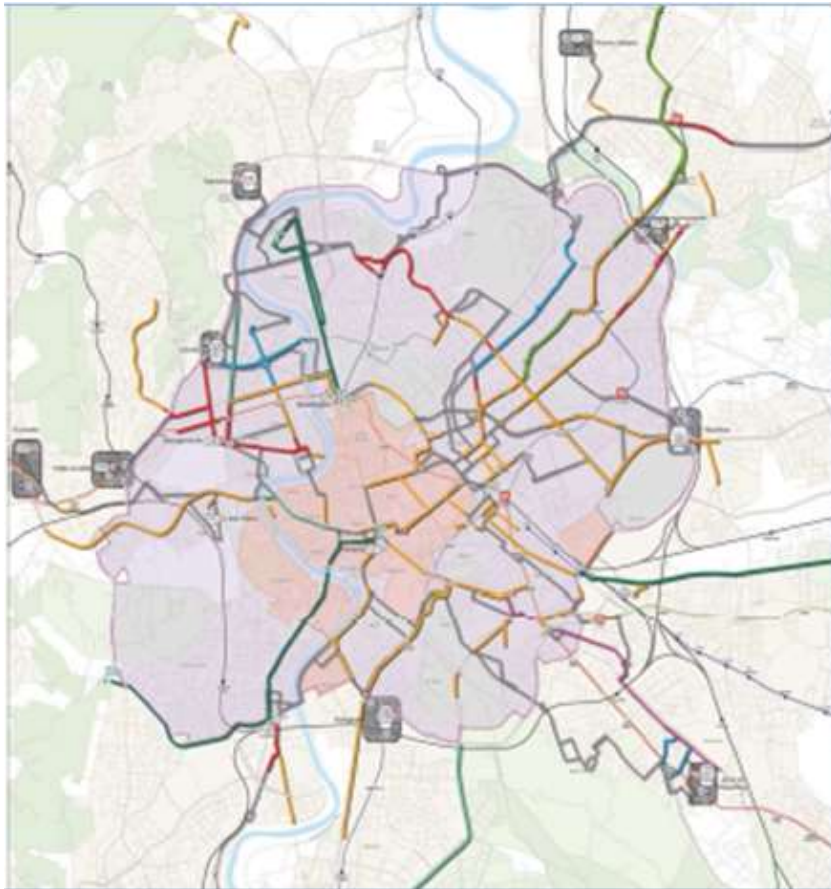

- Length: 3,9 km
- -1,5% city PM10, -4.500 ton CO2
- 9 million hours saved/yr.
- Open 6/2012 up to Conca D'Oro
- Cost: 0,51 Billion €

**Opening of Iorio station:
April 21, 2015**

Rail Ring zone: PT reorganization and CC scheme

- **Rail Ring zone (700,000 inh.):** revised rules to limit private traffic.
- **Rationalization of PT:** more integrated with Metro, Tram and Railways nodes. Reducing and optimizing stops and lines with multiple steps program.

- Promotion of car sharing, car pooling, bike sharing and electric mobility in a **multi-modal approach**;
- **New LTZ concept:** by 2017 rewarding system for non-pollutant drivers with **congestion charging concept**.

LTZs & Access control: electronic Gates

LTZ Historic Center

Mon. to Fri. 6.30 am - 6 pm

Sat. 2 pm – 6 pm

Fri. & Sat. 11 pm – 3 am

LTZ Trastevere

Mon. to Fri. 6.30–10 am

Fri. & Sat. 9,30pm–3am

LTZ Villa Borghese

Mon. to Sun. 0 –24

LTZ San Lorenzo

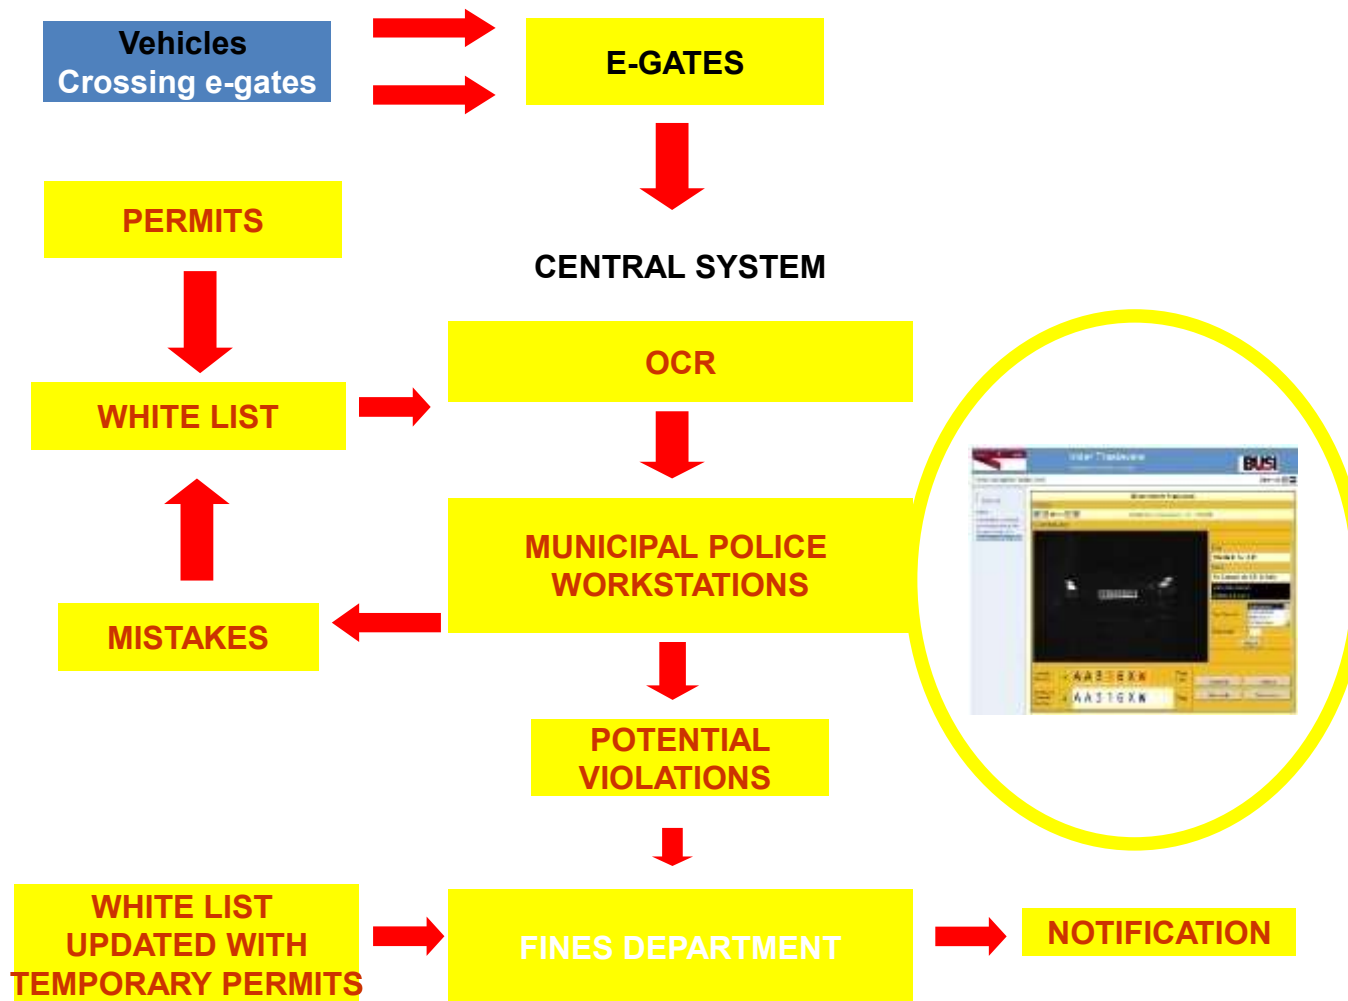

From Wed. to Sat. 9.30 pm – 3 am
(May to July & September- October)

Fri. & Sat. 9,30pm–3am
(November – April)

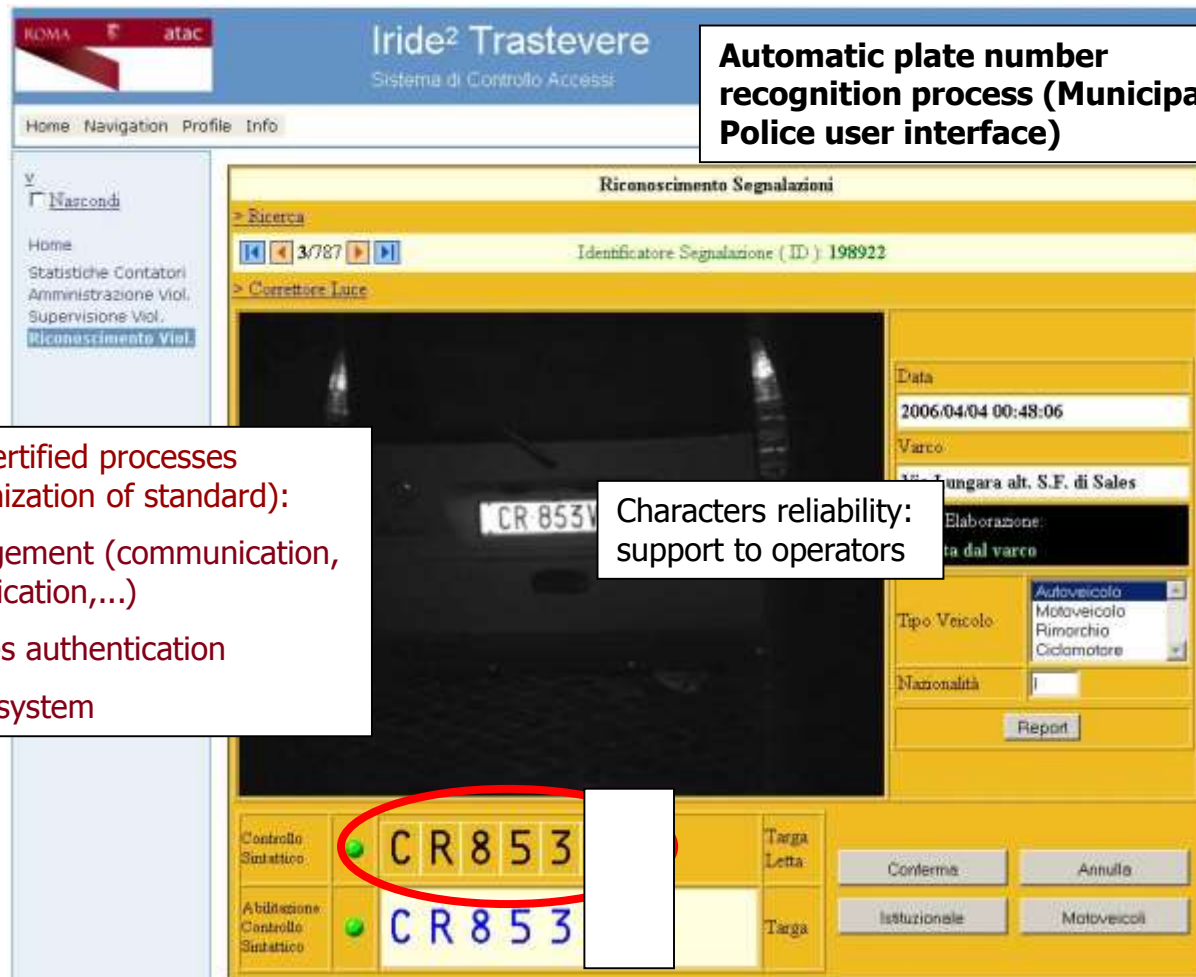

LTZ Testaccio

Fri. & Sat. 9,30pm–3am

The Enforcement process: logical scheme

LTZ – e gates Municipal Police interface

Automatic plate number recognition process (Municipal Police user interface)

UNI certified processes (organization of standard):

- Management (communication, classification,...)
- Images authentication
- Filing system

Characters reliability: support to operators

CR 853

CR 853

Tridente environmental island

1. Closed from-to: 6.30 am – 7 pm (mon-fri) 10am – 7 pm (sat)
2. 4 new e-gates to be made operational next months
3. Closed also to PTW !!

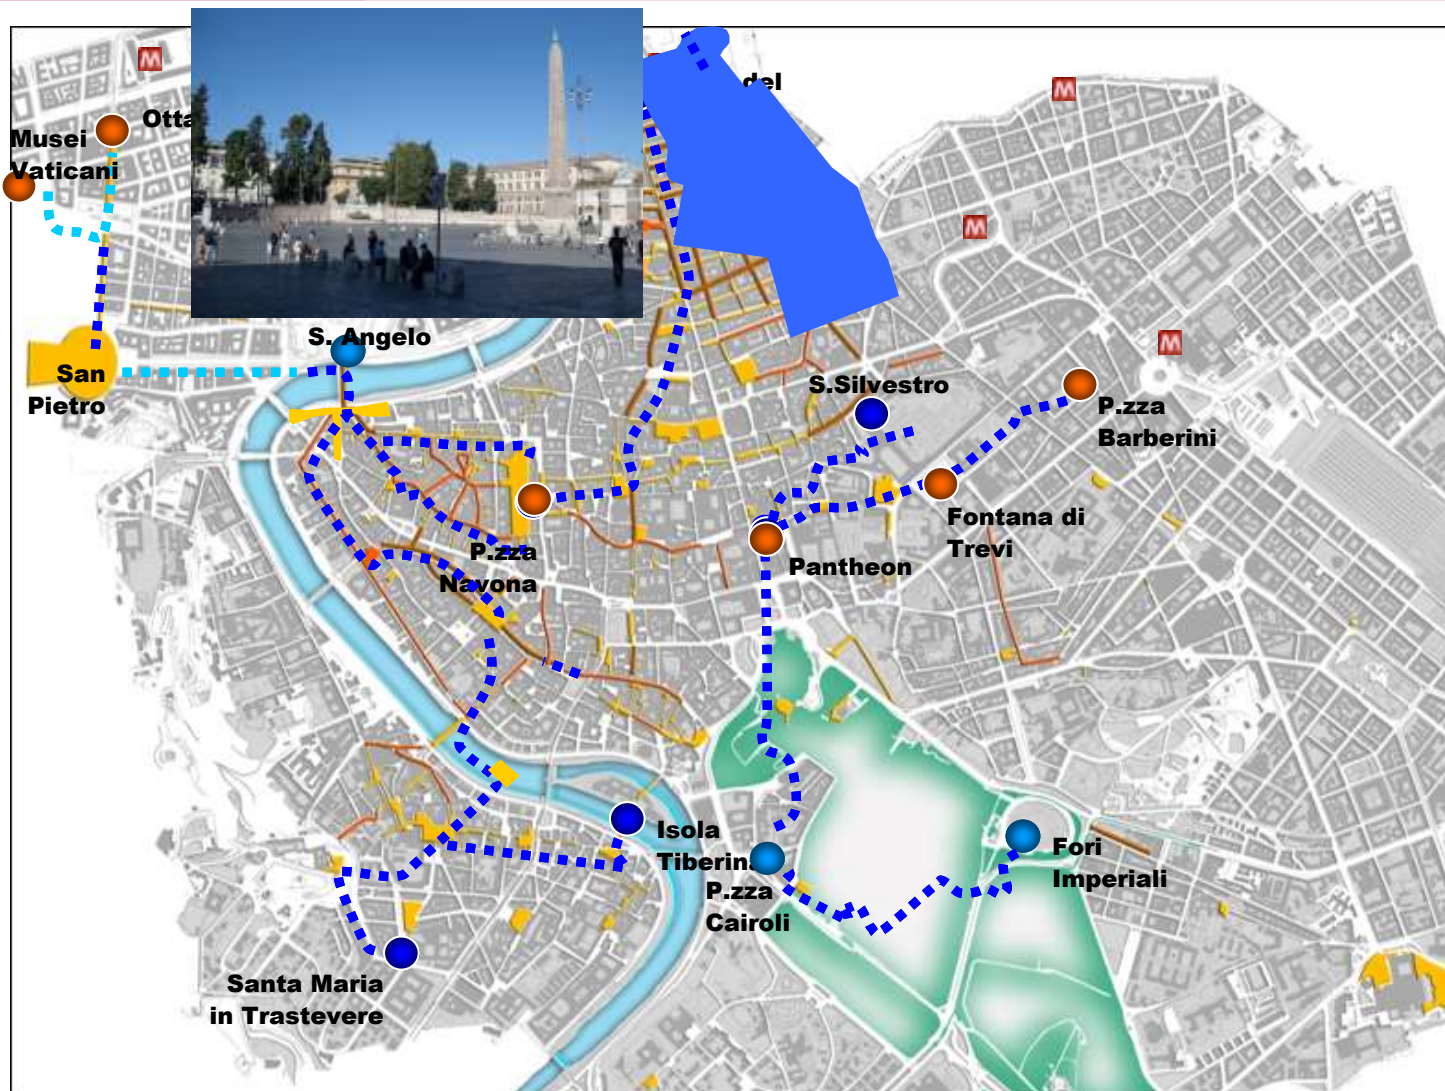

FORI PEDONALI
JUST WALK OR BIKE IT

**IT WAS A STREET
IT WILL BECOME
ROME'S BOULEVARD**

1. Review of access & parking regulation
2. Increase car and bike sharing systems
3. Introduce electric and hybrid vehicles.
4. Create environmental islands, pedestrian areas and pathways

Car-sharing: fixed and free-flow schemes

- **Car sharing fixed scheme:** managed by Mobility Agency, working in 4 central districts. Annual fee, fixed places, return to same place, low hourly costs.
- **Car sharing free-flow scheme:** working in 35 sq km of the city, free places, leave where you want, higher costs (per minute).
- Managed by three Private Operators: **Car2go** (with Smart, operating from March), **Enjoy** (with FCA 500 started in June 2014), **Sharengo** (with e-cars started in Feb 2016)

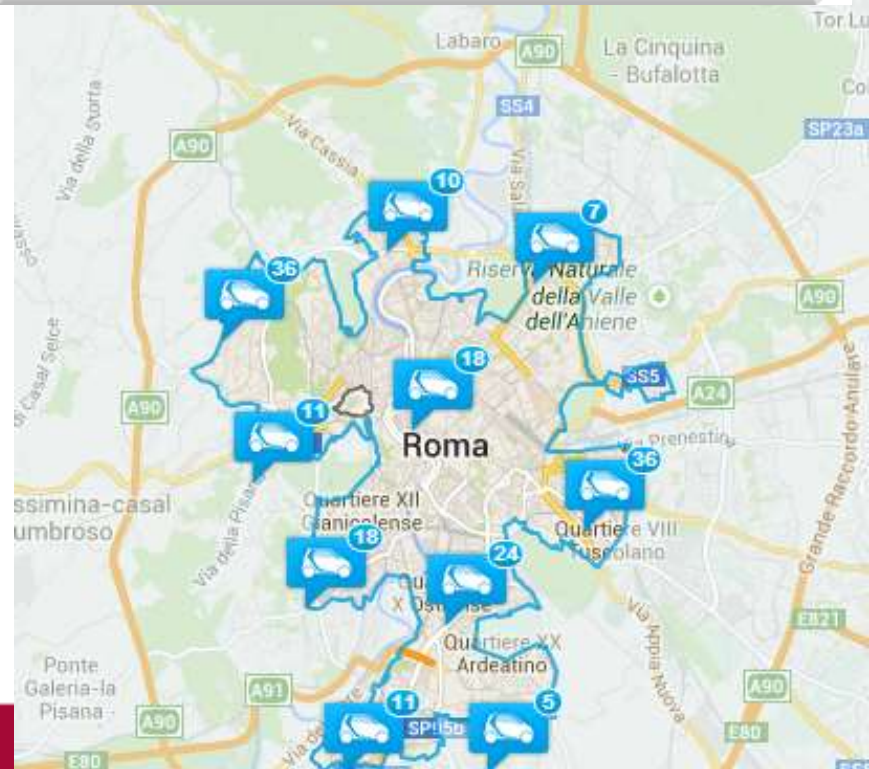

Up to 1500 shared vehicles in 18 months !!

> 100.000 registered users.

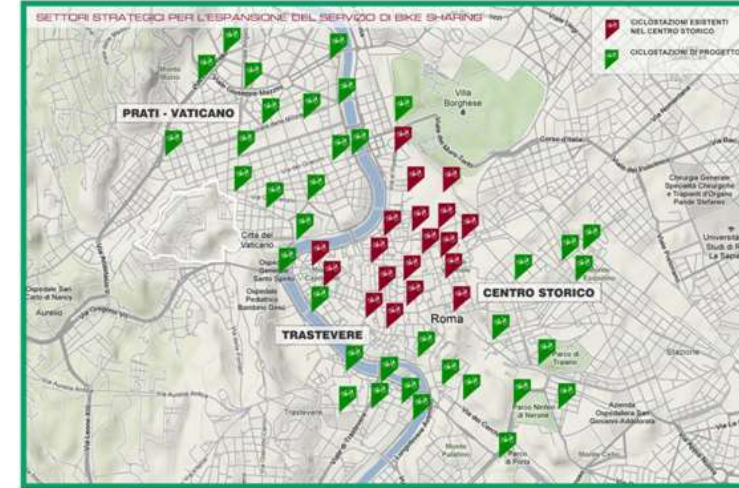

CAR2GO ISCRIVITI GRATUITAMENTE
E riceverai 30 minuti GRATUITI!!
Offerta valida fino al 15.04.2014

- **New bike-sharing scheme:** re-launch of the system with more stations, financed by new advertising installations – to be soon open. Bike availability with open data app.
- **Call for Tender** for scooter-sharing scheme, following the “roman attitude” towards this historic way of moving

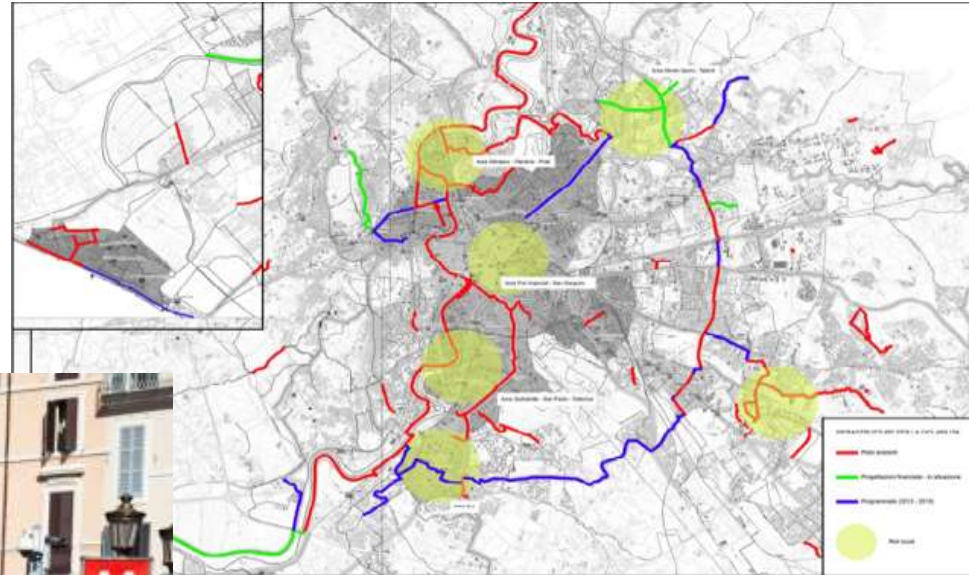

Strong impulse to sharing modes

- Promotion of multimodality and “active mobility”
- Scooter-sharing to limit purchase and travelling of old scooters within the city
- Revitalisation of bike-sharing scheme to be integrated with cycling plan.

- **Working tables** with City Boroughs and associations
- **Selected about 80 Km of track paths**, some already in final design or implementation.

Mobility Center of Rome

The Center then puts together a series of subsystems, each dedicated to the performance of specific functions of monitoring and / or regulation of traffic flows.

	Infomobility	Variable message signs (VMS)	66
		UTT (Urban Travel Times)	51
		Electronic poles of bus stop	300
		muoversiaroma.it - mobile	
	Sanctioning & fining	E-gates for Limited Traffic Zones & Pre-signalling signs	47
		E-gates for PT bus lanes	17
		Fotored	1
		Vistared	10
		Velox	4
		Safety Tutor	2
	Monitoring, Controlling Management	Video surveillance cameras	45
		Traffic Measurement Stations	130
		Traffic lights	1376

• UTT – Urban Travel Times

Monitoring system measuring travel times of private traffic in the urban context. It assess **the level of service** offered by the transportation network, identify problems due to the occurrence of abnormal situations (accidents, events). Information on the state of the traffic on the routes monitored **is transferred in real time** (through different dissemination channels), allowing users to change their routes as a function of the current level of network congestion

Current status

- Over **130 Km** monitored
- Travel time of more than 40 sectors
- **15 routes** monitored
- Data update every **5 minutes**
- Messages posted on VMs & www.muoversiaroma.it

UTT (Urban Travel Times): How does it work ?

• AVM – Automatic Vehicle Monitoring

The AVM system, installed on Atac and RomaTPL fleets and bus, allows real-time capture of key figures relating to public transportation, including the location of the coming bus.

The AVM data is feeding in an automatic way both the electronic poles on roads and traffic service operated by Rome Mobility Services, including

www.muoversiaroma.it

Information to the citizen through **300 electronic poles**: the Mobility Service Centre sends to the poles electronic information on traffic and road conditions, which alternate on the display to the estimated times of arrival of the bus

To date about 2.600 equipped bus

Traffic signals in Rome

Complex systems can implement control strategies for dynamic and static traffic light on the real traffic conditions

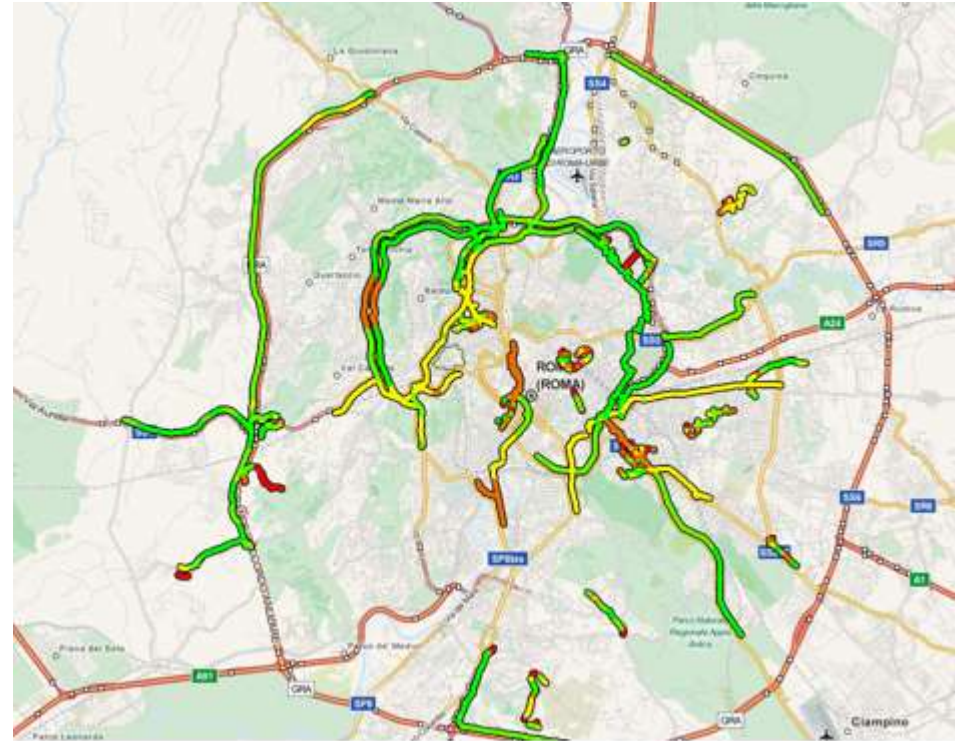

Current status

Traffic signals	1.530
Non centralized	1.003
Synchronized	159
Under UTC	527
with LED lights	315

Data fusion and forecasting – work in progress !

In the coming years:

- **Data ware-house:** integration among different databases and with TEN-T corridor operators
- **Location-aware services and mobile ticketing**, both for PT and parking lots.
- **Open Data & Co-operation:** new projects with EU and int. actors, adapt to standards (DATEX II, REST/JSON), **crowdsourcing**

ROMA CAPITALE

JUBILEE OF MERCY MERCIFUL LIKE THE FATHER

PONTIFICAL COUNCIL FOR THE PROMOTION OF THE NEW EVANGELIZATION

Jubilee of Mercy in Rome: from December 8, 2015

Short terms (end 2015) intervention plan to improve mobility and pollution conditions in order to facilitate the reception of pilgrims coming in Rome with 31 interventions.

visualizza gli interventi cliccando sulla Mappa Interattiva, oppure vedi [QUI](#) l'elenco

- Increase PT efficiency and maintenance, rearrange spaces near main PT & railway nodes, exchange bus parking areas outside the center, new pedestrian and bike paths.
- Strengthening the **mobility network** (roads, subways, junctions of the railway system and of tramways with requalification of surrounding zones, **starting from Termini**).

Jubilee of Mercy in Rome: from December 8, 2015

Open data, ITS: smart city for the Jubilee

Inside the **Jubilee (December 2015 - November 2016)** we are working to:

- Extend the **Open data concept, data standardisation** according emerging EU Regulations, new Priority Zones and link with EU Corridors
- Support the implementation of a “**personal mobility assistant**”;
- **ITS** to support the *city governance*, and the protection of “*environmental Islands*” and optimisation with LED lamps of the traffic light network and its use as ***Internet of Things*** on Rome territory
- **Integration of information** between transport modes and transport operators, integration of the information coming from the social networks.

ITS implementation for the Jubilee

- **Limited Traffic Zone for Rail Ring Area:** implementation of 1st LTZ part to support the *city governance*, controlling tourism coach and freight vehicles crossing the zone and parking areas nearby
- **Integration of information:** testing new infomobility systems coming from EU R&S project, integration of the information coming from train sector.

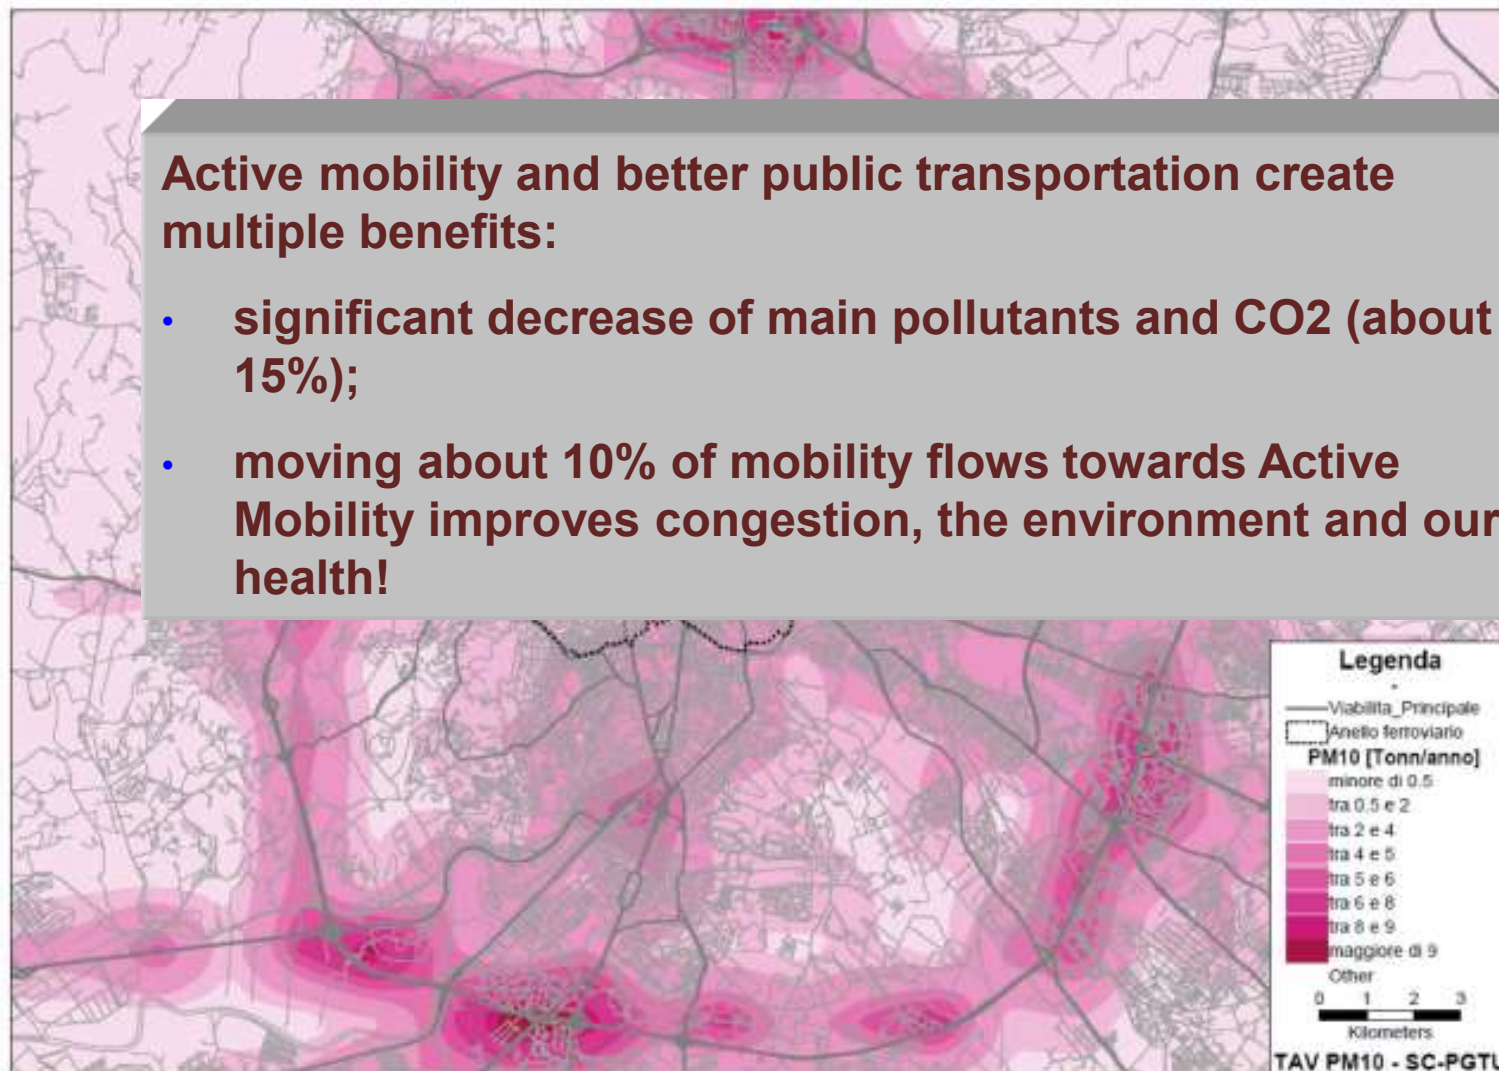

Effect of the Mobility Masterplan on environment: PM10

Active mobility and better public transportation create multiple benefits:

- significant decrease of main pollutants and CO2 (about 15%);
- moving about 10% of mobility flows towards Active Mobility improves congestion, the environment and our health!

ROMA CAPITALE

SMARTICIPATE
